CREATIVE BOOGIE
INTRO - Greetings from KCAD!

Movement allows people to express themselves in extraordinary ways. With the tap of a toe or a sweeping gesture of an arm we can communicate so much without saying a word. And of course it’s fun too!

At Kendall College of Art and Design of Ferris State University (KCAD), we want to help kids of all ages experience motion as an important part of the creative process. That’s why our Continuing Studies youth classes have been developed with energy and curiosity in mind, keeping children engaged and learning as they develop their ability to translate and transform their world.

Give your child the chance to create clay figures that come to life through a class in Stop Motion Animation; create a dynamic painting that dances across the canvas in our new Action Painting class; or dig into the fun and functional medium of clay by pinching, rolling, and building in our Create with Clay class.

Let your kids be moved at KCAD, where movement is always encouraged!
